

Brake caliper

Generic design for simple brake system using rigid lines with flexible hoses at the wheels.

- Features the bulk of the line runs in aluminium tubing (called 'Hard-line' and stocked in our web store) plus short flexible braided hose links to the wheels (200 series Teflon with either crimped or re-usable ends).
- Compatible with single or dual master cylinders; our extensive range of adaptors ensure we can connect to your existing equipment.
- None, single or twin Line-Lock installation optional and can be supplied if required.
- The in-board ends of the flexible links may require special hose ends to fit into OEM clips fitted to inner wings etc. These are available from stock.
